### What is the Math Playground?

Math Playground has started in Term 2 Week 2 for our Primary 1 and 2 students!

Students are scheduled to visit Math Playground once a week during recess. Students will play games such as Jenga, Magic Cube, Monkey Math and Bingo Game.

These games are played either in pairs or in groups. There are 4 assigned Math Ambassadors in each class to assist their peers during the sessions.

All game sets are placed within the hoola hoop. Students who are playing the games will be seated around it.

After the game, students are rewarded with a stamp on their MLC reward card.

They are encouraged to collect as many stamps as they can. Once they have collected 10 stamps, they will be able to redeem a prize.

We really hope that all our students enjoyed playing these games and learnt that Mathematics can be fun!

## March Babies Birthday Celebration!

Wishing each and everyone of them a Happy Birthday!

### P1 Math Trail on Ordinal Numbers

We bring learning beyond classroom for the Primary 1 and 2. Students were given task to complete around the school. They went to the library, General Office, hall and canteen to learn more about Ordinal Numbers. They gathered information and applied what they have learnt into their daily life!

### P2 Math Trail on Length

Our students were given the opportunities to go under the sun! Each group of students were given a trundle wheel and a meter ruler. They used the trundle wheel to measure the length and width of the field. They then used the metre ruler to measure the Lime tree in our very own garden.

Learning Beyond Classroom for the Primary 1 and Primary 2!
